

Joint Solution Brief

SALT SECURITY + CROWDSTRIKE: UNIFIED API SECURITY & THREAT PROTECTION

PROTECTING APIs WITH SALT SECURITY

APIs are the backbone of modern applications, but they also introduce significant security risks. Attackers exploit **shadow APIs, misconfigurations, and business logic flaws** to access sensitive data and disrupt operations. Salt Security provides a **comprehensive API security platform** that enables organizations to:

- **Discover** all APIs, including shadow, zombie, and rogue APIs.
- **Assess** risk by identifying misconfigurations and compliance gaps.
- **Detect attacks** in real time using AI-driven behavioral analysis.
- **Automate response** to API threats with seamless integrations.

SEAMLESS DEPLOYMENT WITH THE CROWDSTRIKE FALCON AGENT

Salt Security now integrates directly with **CrowdStrike Falcon**, allowing for **instant API protection** without additional infrastructure. Through the **Salt Foundry App**, organizations can:

- Deploy Salt's API security sensor **in under five minutes** using the Falcon agent.
- Gain **instant visibility** into API traffic and potential threats.
- Reduce operational overhead by leveraging **existing CrowdStrike infrastructure**.

ENHANCED API THREAT DETECTION & RESPONSE

By integrating with **CrowdStrike's NG-SIEM** and Falcon Firewall, Salt Security strengthens API threat detection and incident response:

- **NG-SIEM Integration:** Salt's API intelligence feeds into **CrowdStrike's Next-Gen SIEM**, correlating API security risks with broader security events for faster threat detection and response.
- **Falcon Firewall Protection:** CrowdStrike's **Falcon Firewall** dynamically blocks malicious API traffic identified by Salt, preventing attacks before they cause damage.

KEY BENEFITS

Expanded API Discovery with Salt API Security

Stronger Threat Detection with Falcon Next-Gen SIEM

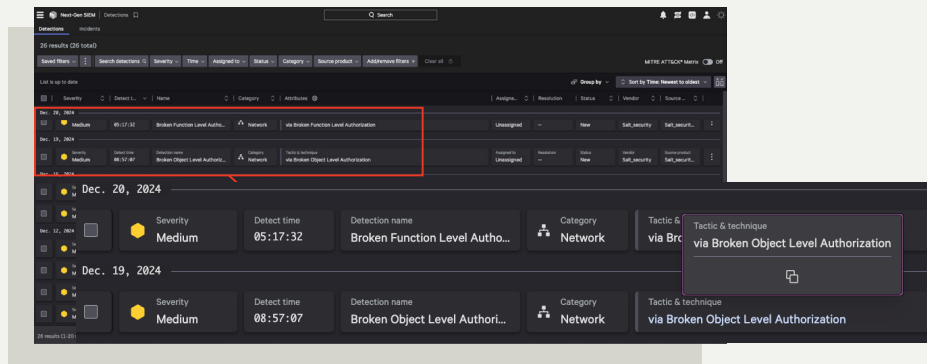

Seamless Integration with Falcon Firewall

SALT SECURITY + CROWDSTRIKE: UNIFIED API SECURITY & THREAT PROTECTION

THE POWER OF SALT + CROWDSTRIKE

- ✓ **Faster deployment** – No new infrastructure needed, leveraging existing Falcon agents.
- ✓ **Stronger detection** – API-specific threats correlated with broader security events in NG-SIEM.
- ✓ **Automated response** – Seamless integration with Falcon Firewall to block API attacks in real time.

This partnership **simplifies API security** while delivering **unmatched threat visibility and response capabilities**.

ABOUT SALT SECURITY

Salt Security is a leading AI-infused API security company that provides a comprehensive platform for securing APIs across their entire lifecycle. Their solutions help organizations discover, govern, protect, and manage their APIs to prevent API attacks and ensure the integrity of their critical data.

ABOUT CROWDSTRIKE

CrowdStrike Holdings, Inc. (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with one of the world's most advanced cloud-native platforms for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform enables customers to benefit from rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
